

Our client is an international biotech company that successfully developed a broad pipeline of vaccine candidates and immune-modulatory therapies using its innovative platform technology. Founded in 2009 by a group of internationally renowned vaccine and biotech executives in Vienna, the company is now a wholly owned subsidiary of one of the biggest players on the global pharma market. Its pipeline includes vaccine development programs against infectious diseases like SARS, Chikungunya, MERS, and Lassa fever.

We are hiring in Vienna:

Process Development & CMC Expert (f/m/d)

Tasks and responsibilities:

- Ensuring the CMC elements are developed or in place as key components of the company's product development plans.
- Coordinating internal and external process development and optimization activities.
- Managing technology transfer to contract manufacturing organizations for early stage projects
- Managing of internal collaborators and external contractors (CMOs) effectively to ensure CMC and development projects are conducted to an appropriate standard in terms of quality, time and budget
- Ensuring internal systems are developed in order to guarantee that CMC activities are performed in compliance with current regulations as well as internal standards

Required qualifications and skills:

- University Degree – preferably a PhD - in chemical or life sciences or related
- 3 years of experience in CMC or in a similar position in the field of biopharmaceuticals/ human vaccines
- Expertise in upstream and downstream development as well as biological product formulation
- Expertise in pharmaceutical product development and manufacturing
- Understanding of standard molecular biology methods (e.g. PCR, cloning, cell-based assays, ELISA, Western Blot) required for QC testing
- Knowledge of international guidelines (ICH, FDA, EMA, cGMP, etc) and an experience with regulatory documents
- Experience in contract manufacturing organization (CMO) management
- Strategic Thinker with excellent leadership, problem solving and decision-making skills
- Project Management skills with the ability to prioritize multiple tasks
- Strong verbal and written communication and presentation in English and German
- Effective communication with cross-functional stakeholders
- Willingness to travel

The offer:

- The minimum monthly gross salary for this position is EUR 3.800 (14 times), all in. Depending on your qualifications and professional experience the salary may be higher.
- Teamwork-oriented culture and friendly working environment
- Dynamic environment and interesting development perspectives
- Easy to reach work place

We are looking forward to receiving your application! Please apply by submitting your CV, a letter of motivation and eventually your references.
