

Evologic Technologies aims to supply Any Biological at Any Scale, Anywhere by unlocking biologicals with manufacturing technology. Evologic is focusing on the Agri Input Market opportunity. Outside of Pharma, this is the sweet spot of product value and market protection. The growing Agri Input market is an opportunity to capture value with fermentation-based manufacturing Technology.

We are a growing, highly dedicated, energetic, international team of 30 employees with research and production centralized in our site in Vienna's 23rd district. The office is easily accessible by public transport. We offer interesting challenges in an innovative and motivated environment, with flat hierarchies and short decision-making processes.

For our site in Vienna, we are looking for a dedicated expert for:

Automation Engineer (m/f) – Full time

For this position we are looking for a self-motivated, team-oriented person with high organisational skills and the willingness to contribute to the further development of the company. You will be working directly with our Development and Manufacturing Team.

Responsibilities:

- Maintain and expand inhouse automation capabilities (lab to industrial scale)
 - Fully integrated equipment
 - Stand-alone unit operations
- Design and realize new automation routines to support development and production
- Programmable logic controller (SPS) setup and integration
- Set up and configure PLCs according to their documentation
 - Integrate sensors and actuators into PLCs
 - Build electrical circuits for probes and actuators to integrate into our PLCs
- Troubleshoot industrial equipment during production, identify root causes and propose solutions.

Requirements:

- General PLC or SPS knowhow
- Knowledge of Modbus TCP, Modbus RTU, OPCUA if possible
- Practical examples of integrating analogue and digital data streams into a data lake
- Python or Micropython based programming
- Experience with database management software using PostgreSQL
- Practical knowledge of electrical/electronic engineering
- Very good knowledge of English (company language), German (highly desirable)

We are looking forward to receiving your application by mail to office@evologic-technologies.com.

For legal reasons, we are obliged to point out that the collective agreement minimum salary for this position is € 3.400,00 full time gross p.m. The willingness to overpay according to your qualification/experience profile is of course given. In addition to benefits, we offer flexible working conditions.
