

Grow different.

At **Evologic Technologies**, our mission is to supply Any Biological at Any Scale by unlocking the potential of biologicals through advanced manufacturing technologies.

Evologic is focusing on the **Agri Input Market** opportunity. Outside of pharma, this market represents the sweet spot of product value and market protection. The growing Agri Input sector offers a unique chance to create value through fermentation-based manufacturing technology.

We are a growing, highly dedicated, and energetic international team of 30 employees, with research and production centralized at our site in Vienna's 23rd district. The office is easily accessible by public transport. We offer exciting challenges in an innovative and motivated environment — with flat hierarchies and short decision-making processes

For our site in Vienna, we are looking for a dedicated:

Mechanical & Electrical Technician- Full-time 6 months

Evologic's production team is looking for an independent, results-oriented, and motivated individual who feels comfortable working with technical equipment at both lab and industrial scale, and is eager to demonstrate technical understanding and dedication in maintaining equipment and ensuring its continuous operation. This position includes responsibilities such as maintenance, repair work, functional testing, and equipment documentation, combined with a collaborative mindset and a diligent work ethic.

Responsibilities:

- Installation, setup, maintenance, and repair of equipment (manufacturing machinery, laboratory equipment)
- Installation, setup, maintenance, and repair of infrastructure/utilities (e.g., compressed air, cooling water)
- Creation and improvement of prototypes in the in-house workshop
- Support for the in-house automation team
- Solution-oriented troubleshooting of mechanical and electrical issues
- Management and ordering of spare parts and tools

Requirements:

- Technical background (HTL degree or completed apprenticeship, e.g., toolmaker)
- Experience in welding and electrical installations is beneficial
- Basic troubleshooting skills for both mechanical and electrical systems
- Proficiency in using hand and power tools
- Ability to work independently and accurately, as well as collaboratively within a team
- Good command of English, as it is the company's working language

We look forward to receiving your application via email at office@evologic-technologies.com. Please note that this is an **internship position**, and we are seeking candidates whose highest level of education is a **Bachelor's degree**.

The monthly gross salary for this position is €2,300 based on a 38.5-hour work week. However, we are, of course, willing to offer a higher salary depending on your qualifications and experience.
