

About Myllia

At Myllia Biotechnology, we pioneer single-cell CRISPR screening technologies that enable pharma and biotech partners to discover and validate new drug targets with unprecedented resolution. Our platforms - including the newly launched [VISTA](#) - empower researchers to explore the genetic underpinnings of immune biology and disease. We operate as a fee-for-service functional genomics CRO, collaborating with global pharma and biotech partners.

To strengthen our visibility and accelerate growth, we are seeking a Commercial Associate who will drive (digital) marketing activities and help turn our cutting-edge science into a strong, scalable commercial presence.

Commercial Associate (m/f/d)

Location/Job Type: Vienna, Austria (Hybrid); full-time, or part-time

Date posted: December 19, 2025

Department: Commercial - Business Development & Marketing

Reports to: VP, Commercial

Role Summary

The Commercial Associate will support lead generation, marketing campaigns, and brand visibility for Myllia's services. Working closely with the Commercial Leadership team in Vienna, Austria (on-site) and in New York, US (remotely), you will create and execute marketing activities that position Myllia as the partner of choice for immune-focused CRISPR screening. This is an excellent role for someone passionate about life sciences communication, digital marketing, and scaling biotech innovation.

What you'll do

As our Commercial Associate, you'll play a vital role in shaping and executing our marketing strategies and supporting our business development (BD) activities. Your tasks will include:

- Support Myllia's visibility at international conferences in Europe and in the US
- Assist our Commercial and R&D teams before and during the [Perturb 2026](#) conference in Vienna
- Executing marketing campaigns: Work with the Commercial team to create impactful campaigns
- Promoting content: Boost engagement by sharing our content across relevant digital platforms
- Monitor KPIs and analyze performance metrics on our website and social media channels
- Co-manage the website via back-end tools and improve search engine performance (SEA, SEO)
- Contribute to marketing activities (presentations, marketing items and toolkit)
- Perform research and due diligence on potential leads and help maintain the CRM

What we're looking for

- Bachelor's or Master's degree in Marketing, Communications, and/or Life Sciences
- 1–2 years of experience in digital marketing, preferably in biotech, life sciences, CRO, or B2B
- Familiarity with Google Ads, Google Analytics and SEO tools required
- Experience with CRM systems for account management, prospecting and lead capture
- Online marketing expertise: Course work, internships, or projects in digital marketing preferred
- Social media: Experience using platforms like LinkedIn to reach and engage with audiences
- Analytical mindset: Ability to track and interpret data to improve campaign performance
- Eager to grow your skills in a dynamic digital marketing environment
- Networking enthusiast to identify, contact and engage with new leads in biotech and pharma
- A background in biology/biotechnology/bioinformatics is advantageous but not required

Why join us?

- Gain hands-on experience with real-world marketing campaigns in the biotech industry
- Flexible hours and the opportunity to travel within Europe and the US for conferences
- Work in an international, collaborative, and growth-focused environment

Are you ready to make your next move in digital marketing linked to biotechnology research? Then apply now with your CV and a brief cover letter detailing your experience to Henrik Schmidt and Neil Matharoo (jobs@myllia.com). Please note that applications will be considered on a rolling basis until January 16, 2026 – we look forward to hearing from you!
